

UEI	FU42WX16QWS5	CAGE	PENDING	SAM.GOV	Registration in progress
ENTITY	Delaware C-Corporation	STATUS	Small Business	OWNERSHIP	US citizen-owned

CORE CAPABILITIES

- **AI for OT and SCADA security.** Anomaly detection for industrial control systems, weapon-system telemetry, and critical-infrastructure networks in contested environments.
- **Data integration across DoD logistics.** Pipelines, entity resolution, and source reconciliation across stovepiped logistics, maintenance, and supply systems.
- **Decision-support for mission planning.** Course-of-action analysis and human-in-the-loop tooling that compresses planning cycles and surfaces options analysts would miss.

DIFFERENTIATORS

- Product-grade engineering from a senior team — no body shop, no offshore subs.
- AI built in-house from day one, not assembled from consultancy partnerships.
- US citizen-owned; NIST SP 800-171 self-assessment underway, CMMC Level 2 planned.
- Software publisher (NAICS 513210) — we own the IP we build, opening Phase III sole-source and IDIQ paths.

NAICS CODES

- **541715** (primary) — Research and Development in the Physical, Engineering, and Life Sciences
- **541511** — Custom Computer Programming Services
- **541512** — Computer Systems Design Services
- **513210** — Software Publishers

SECURITY & POSTURE

- CMMC: NIST SP 800-171 self-assessment in progress; CMMC Level 2 planned
- Cloud: Microsoft 365; GCC High planned before handling CUI
- Citizenship: 100% US citizen-owned and operated
- Facility clearance: No facility clearance at this time
